

Learn about the next steps to lay infrastructure required to bring homes and businesses in parts of Greenfield, Middlefield, Pleasant River & Maitland Bridge one step closer to accessing reliable high-speed Internet. While these projects will establish the backbone network needed, not connections to homes and businesses, Develop Nova Scotia's job is to continue to bridge those gaps.

All are welcome. Join us at a community drop-in event to hear more about our plans to build a better connected Nova Scotia, see the progress we've made, hear about the next steps, and understand the investments involved to deliver high-speed Internet to more than 95% of Nova Scotians.
